

HashMap

a

Hashing → Process of converting object into integer
↳ It helps in indexing and faster searches

HashMap →

- ↳ Collection
- ↳ Hashing
- ↳ Implements Map interface
- ↳ <Key, Value>
- ↳ Array of nodes

HashMap & Integer String

→ hashCode () → Bucket Number

→ equals () → Checks equality of two objects

↳ Compare the key

$\langle K_1, V_1 \rangle$ $\langle K_1, V_2 \rangle$

equals

Buckets →

N1

N2
